RHODE ISLAND FAMILY ECONOMIC SECURITY PROFILE

State policies that promote the economic security of our nation's families can help offset larger economic and social conditions that make it difficult for families to get by and get ahead. This four-part profile provides data on Rhode Island's low-income children and families and highlights state policy choices regarding families' work attachment and advancement, income adequacy, and asset development.

In Rhode Island, there are 142,963 families, with 239,952 children. Among these children, 34 percent live in families that are low-income, defined as income below twice the federal poverty level (nationally, 39 percent of children live in low-income families). Young children are particularly likely to live in low-income families.

Low wages and a lack of higher education contribute to families having insufficient incomes. Nationally, 55 percent of low-income children have at least one parent who works full-time, year-round; in Rhode Island, the figure is 40 percent.

Parents without a college education often struggle to earn enough to support a family, but only 30 percent of adults in Rhode Island have a bachelor's degree. A substantial portion of children in Rhode Island whose parents only have a high school diploma--48 percent--are low income.

Children of foreign-born parents are also more likely to be low income than children of native-born parents.

DATA NOTES AND SOURCES

Data were compiled from 50-state sources. Some state policy decisions may have changed since these data were collected.

1. State data were calculated from the Annual Social and Economic Supplement (the March supplement) of the Current Population Survey from 2006, 2007, and 2008, representing information from calendar years 2005, 2006, and 2007. NCCP averaged three years of data because of small sample sizes in less populated states. The national data were calculated from the 2008 data, representing information from the previous calendar year.
2. In March 2007, the income limit was increased to \$38,663 to adjust for the 2007 federal poverty level.
3. Karen Schulman and Helen Blank, *State Child Care Assistance Policies 2007: Some Steps Forward, More Progress Needed*, National Women's Law Center, September 2007.
4. As of March 1, 2007, the monthly copayment was \$85 per month, \$1,020 per year, and 4 percent of income.
5. If the state calculates co-payments based on the cost of care, figure reflects the co-payment for a 4-year-old in licensed, nonaccredited center care at the maximum state payment rate.
Karen Schulman and Helen Blank, *State Child Care Assistance Policies 2007: Some Steps Forward, More Progress Needed*, National Women's Law Center, September 2007.
6. Karen Schulman and Helen Blank, *Child Care Assistance Policies 2005: States Fail to Make up Lost Ground, Families Continue to Lack Critical Supports*, National Women's Law Center, September 2005.
7. States were asked to report state reimbursement rates and the 75th percentile of market rates for their state's most populous city, country, or region. Data reflect basic provider payment rates (higher rates may be available for particular types of care). Rates are considered below the 75th percentile if they are based on an out-dated market rate survey (more than 2 years old).

12. Lawfully residing persons who were in the U.S. before August 22, 1996, and were residents of Rhode Island before July 1, 1997, are covered.
13. Lawful permanent residents (LPRs) are generally barred from federal benefits during their first 5 years as LPRs, unless they entered the U.S. before 8/22/96. Exceptions include refugees and U.S. veterans (and their families). See data source for more details.

 23. A general "good cause" provision extends eligibility to persons who leave their jobs for "personal emergencies" or "compelling circumstances", which should include--among others--child care conflicts, illness, domestic violence, and spousal relocation. Eligibility determinations, however, may vary in practice. States may also specifically recognize certain reasons as "good cause"; for more information see Appendix B in Rebecca Smith, Rick McHugh, Andrew Stettner, and Nancy Segal, *Between a Rock and a Hard Place: Confronting the Failure of State Unemployment Insurance Systems to Serve Women and Working Families*, National Employment Law Project, 2003.
